Work Experience

Frontend-Developer
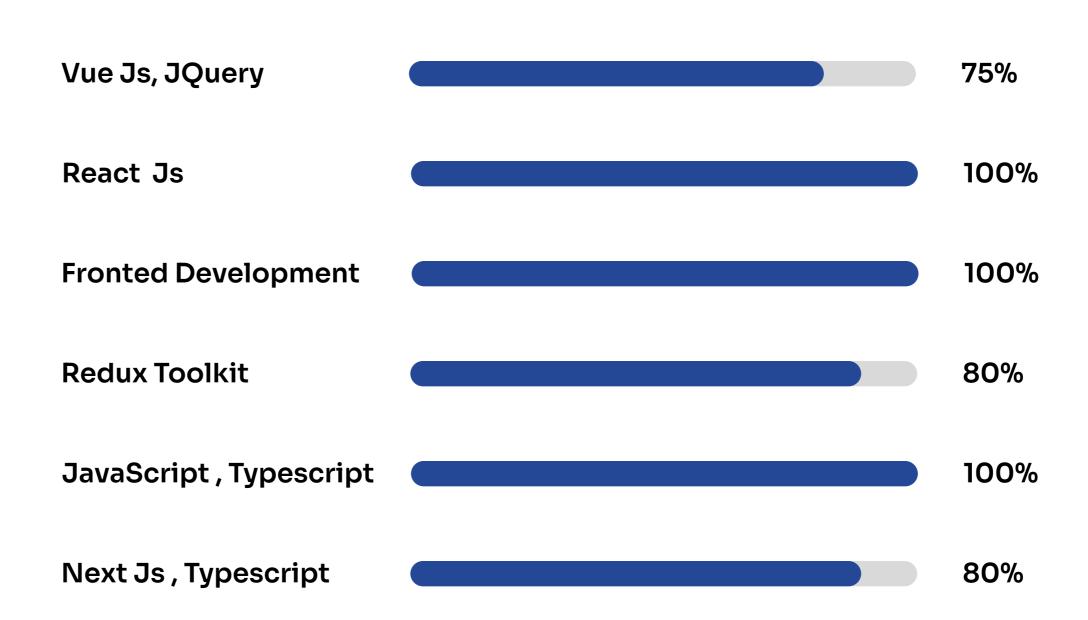

MMSIT, Yangon 2023 Jan- 2023 Jun

I work as a Frontend Developer at MMSIT workshop where our team collaboratively builds web-based point-of-sale (POS) systems. Despite encountering numerous challenges with API calls and UI issues, we persevere through collective efforts, involving frontend, backend, and UI teams. This collaborative environment has not only equipped me with valuable knowledge but also enriched my experiences in backend development and user experience design.

Frontend-Developer

Develop X , 2023 September- Present

- Specialized in building cross-platform web views for Android and iOS applications, ensuring consistent and responsive UI/UX across a wide range of device resolutions and OS versions.
- Collaborated closely with mobile development teams (iOS & Android) to integrate APIs, optimize performance, and debug platform-specific issues, leading to smoother releases and reduced cross-device inconsistencies.
- Played a key role in the development of media-centric applications, including movie streaming platforms with custom video players and adaptive playback for mobile devices.Contributed to secure and user-friendly wallet/payment system features, addressing mobile compatibility, API reliability, and responsive transaction flows.
- Actively resolved complex cross-device issues related to layout rendering, input behavior, media compatibility, and performance bottlenecks, improving stability across the app ecosystem.
- Worked on multiple company profile websites and internal tools, applying responsive design, accessibility standards, and UI enhancements that aligned with business and branding goals.
- Gained deep exposure to mobile web challenges, hybrid architecture constraints, and collaborative delivery pipelines, building a strong foundation in mobile-first and cross-platform development practices.
